I have been searching Summer(06) course offerings at the local colleges and have compiled a list of EDU and SED classes that are available at times that may be feasible for working teachers. The list also includes ITV and Online classes. You can check to see if a class is full by logging onto the college web site. If a class is listed as closed and you really need it, contact me and I may be able to get you admitted. I've included the campus location, time, day and room number.
